

HP Z4 G6i Workstation Desktop PC (E7EU1LT)

Overview

Unlock next-level scalable power

Power through multi-threaded tasks with high-end, multi-GPU compute. The HP Z4 G6i AI workstation helps you tackle complex workflows—from rendering and simulation to advanced video editing and massive dataset preparation. With HP Z Boost[1], share access to idle GPUs, maximizing utilization and ROI.

Engineered to accelerate workflows

Drive innovation in graphics-intensive and data science workflows with an Intel® Xeon® CPU[2], NVIDIA RTX PRO™ graphics, plus expansive storage and memory options.

Solutions for smarter workflows

Get more out of the HP Z4 G6i with key hardware and software solutions. Add an HP Remote System Controller[3] to enable remote out-of-band management, and HP Z Boost[1] to share its idle GPUs across teams—improving productivity and maximizing resources.

Upgrade. Expand. Evolve.

The HP Z4 G6i AI workstation enables tool-less access for quick upgrades. The optional Max Side Panel offers extra thermal and spatial benefits, while the optional rail kit makes it rack-ready. The new lattice bezel helps keep it cool and quiet.

Designed with purpose

HP cares about the impact our products have. That's why this device is designed with recycled materials, including plastic, steel and rare earth elements and is EPEAT Gold with Climate+.[4]

Rack Ready Design

Simplify workstation management with the rack ready design. Fit one unit in a 4U rack. Add the optional rail kit for seamless integration and easy scalability.

[1] HP Z Boost requires client device with Windows 10 or Windows 11 OS and Vulkan Runtime for devices without a GPU, or WSL2 with Ubuntu 22.04 or Ubuntu 22.04 LTS or greater. Host device for sharing GPU(s) must be a HP Z workstation with NVIDIA professional grade workstation GPU(s) of Pascal architecture or later with an installed driver version 535 or greater, and a CUDA driver version 11.2 through to 12.3, Windows 10 or Windows 11 OS (WSL is not supported), or Ubuntu 22.04 LTS or greater or Debian 11 or greater with libatomic1, libnuma1, libvulkan1, libgl1, libglib2.0-0 packages installed. Network connection required. Join waitlist to be considered for selection for early access.

[2] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of clock speed. Features and software that require a NPU may require software purchase, subscription or enablement by a software or platform provider.

[3] HP Remote System Controller is sold separately. Internet access required.

[4] EPEAT tier levels may vary by country. See www.epeat.net for registration status and tier levels by country.

[5] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 11 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See

<http://www.windows.com>. Microsoft Copilot requires Windows 11. Some features require an NPU. Timing and availability will be dependent on Microsoft and varies by market and device. Requires Microsoft account to log in. Where Copilot is not available, the Copilot key will lead to the Bing search engine. See <http://aka.ms/WindowsAIFeatures>.

[6] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance. Intel vPro® Enterprise technologies are available only on Intel® Xeon® W-3500 and Intel® Xeon® W-2500 processors. Intel vPro® requires Windows 10 Pro 64 bit or higher, a vPro supported processor, vPro enabled chipset, vPro enabled wired LAN and/or Wi-Fi 6E WLAN and TPM 2.0. Some functionality requires additional 3rd party software in order to run. Features of vPro® Essentials and Enterprise vary. See <http://intel.com/vpro>. Error Correction Code (ECC) memory enables enhanced data reliability. ECC memory is only available on Intel® Xeon® processor options.

[7] Memory is an optional feature that must be configured at purchase.
